

Tulikivi Sauna App

Application to use Sauna Control Panel remotely

Dear Tulikivi customer

You have purchased a high-quality control panel, which allows you to control Tulikivi electric sauna heaters in many ways.

Congratulations on your excellent choice!

You now have the opportunity to control and adjust your sauna time also remotely via a mobile application.

This user guide is intended for the owner of the sauna or the person responsible for maintenance of the sauna.

Once the control panel has been installed, this user guide should be given to the owner of the sauna or the person responsible for maintenance of the sauna.

Please read the user guide carefully before use.

Have an enjoyable sauna experience!

YOU CAN INSTALL THE MOBILE APPLICATION

Tulikivi Sauna

either from the web by following the instructions on this page

or from an application store.

To use the Tulikivi Sauna Control remotely, you only need a phone number, a wireless network connection and a mobile device. By following the instructions the application is easy and fast to install and you will be able to start using the application immediately.

Open the browser on your mobile device and input: <https://tulikivi.web.app> to the address field. Next, the browser will ask you for your phone number. Enter your phone number in international format and press "VERIFY".

You will receive a text message containing a six-digit code. Enter the code in the input field. You will then be asked to confirm the phone number shown on the screen and press "CONTINUE".

If you can't find the code in your phone's text messages, you can ask the service to send the code to you again by pressing the "RESEND" link.

The application opens in the browser, from where you can install it on the phone's home screen by pressing the option "INSTALL" from the dialog that opens in the browser. If the dialog does not open (depending on the browser model), you can save the application yourself.

To save the application to the home screen of the mobile device, look for the command "Add to home screen" in the browser properties of your device.

The command can be found under the icon depending on the operating system:

iOS

or

Android

After the application has been successfully added to the home screen, you can close the browser page. To control the sauna Control Panel, tap the Tulikivi Sauna application icon you added and start using the application by connecting the Control Panel device and the application via a wireless network.

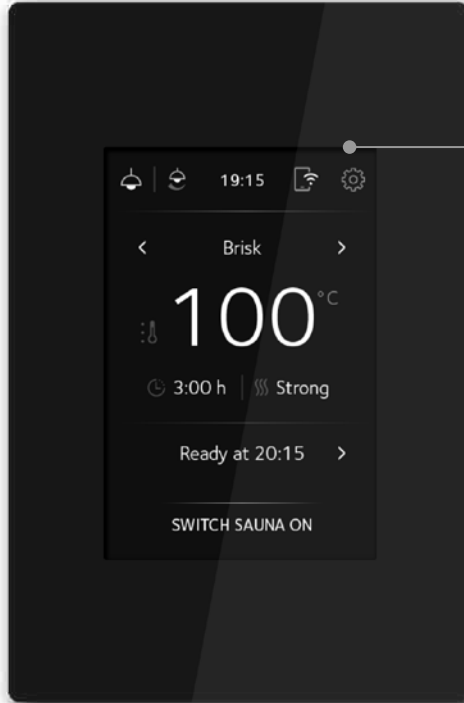

Check that both devices have a network connection and start by adding the sauna, where the control panel is located, to the application.

On the following pages you will find instructions for establishing a connection and managing the Sauna Control Panel via the Tulikivi Sauna application.

SAUNA LIST - ADD YOUR SAUNA

1

Identification code in Control Panel

The sauna list contains all the saunas that the user wants to manage remotely.

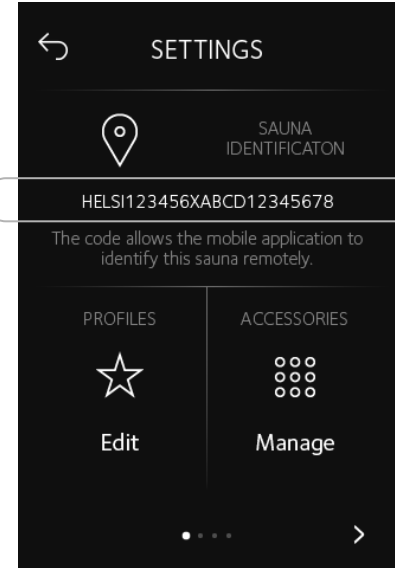

To add your own sauna to the list, you need a network connection and the sauna identification code, from which the application will recognise the sauna.

You can find the identification code from the control panel settings.

CONTENTS:

1. Identification code
2. Add sauna
3. Sauna list
4. Sauna management tools
5. Status of the Sauna

Tap the Settings icon in the control panel. The identification code can be found on the first page of the settings.

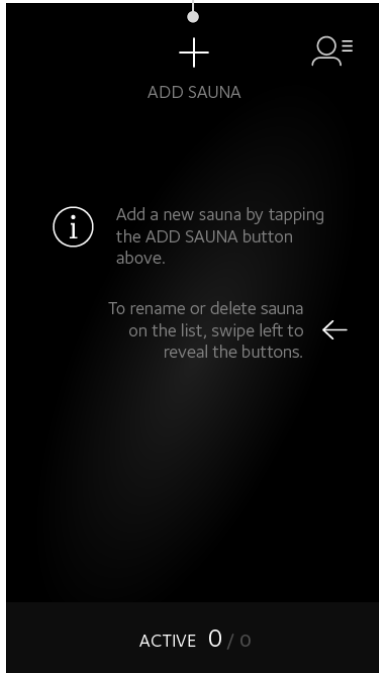

NOTE!

The code shown in the picture is only an example. Each control panel has its own, control-specific code.

Add sauna

2

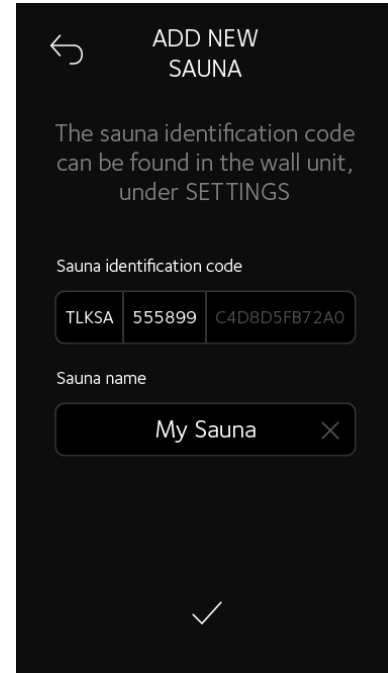

Tap the PLUS icon at the top to add your sauna to the list.

The application asks you to enter the identification code of the Sauna Control Panel. (see previous page)

The code consists of both numbers and letters. The application will help and instruct you to enter the code correctly.

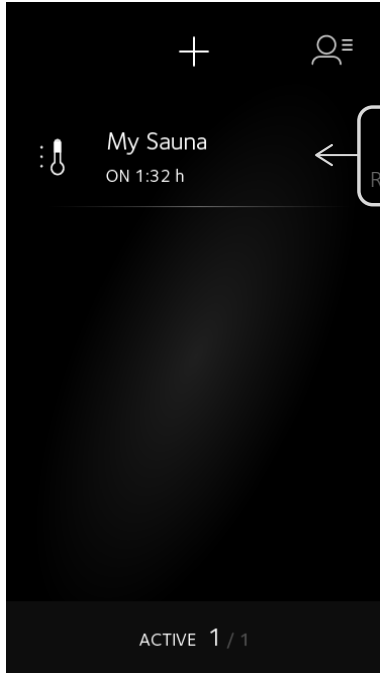

Give the sauna an easy-to-recognise name. For example, choose a name according to place, person or address.

Confirm by tapping the OK button below.

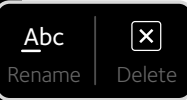

3

Sauna list

4

Sauna management tools

Management tools appear by swiping left.

Sauna management tools allow you to rename or remove the sauna from the list.

The identification code cannot be edited.

If the sauna has been removed from the list, the user must repeat step 2 ("Add sauna") to add it again.

5

Status of the Sauna on the list

The sauna list icons tell you the activity of the sauna in real time.

Active saunas / Number of saunas on the list.

FEATURES OF THE HOME VIEW

 short (single tap)

 short tap or swipe (scroll up or down, left or right)

You can set the desired sauna temperature, sauna time and the löly quality, i.e., its intensity.

These three features form different profiles, from which you can choose the sauna experience that is just right for you.

After selecting the profile, the application indicates the time when the sauna is ready, i.e., it has reached the set temperature the fastest. You can also change the time to a later one that suits you better, i.e., set a timer. The application ensures that your sauna is ready exactly at the time you specify.

With the application you can also manage the lighting of the sauna.

The screenshot shows the 'My Sauna' app interface. At the top, there's a header 'My Sauna' with a list icon (1) and a name/ID code (2). Below this are light controls (3) and a settings gear (4). The main area displays the current profile 'Brisk' (5) with a back arrow and a right arrow. The current sauna room temperature is 65°C (6) and the target temperature is 100°C (7). The sauna time is 2:00 h (8) and the löly quality is 'Strong' (9). Below this, it says 'Ready at 10:00' (10) with a vertical scroll bar. At the bottom, there's a large button 'SWITCH SAUNA ON' (11).

- 1. Sauna list
- 2. Name of the Sauna -ID code name
- 3. Light controls ON/OFF | Dimmer
- 4. Sauna Settings
- 5. Select profile

LÖYLY SETTINGS:

- 6. Sauna room temperature
- 7. Target temperature
- 8. Sauna time -the time the heater is ON
- 9. Löyly quality

- 10. Select the sauna ready time
- 11. Switch ON/Start Timer

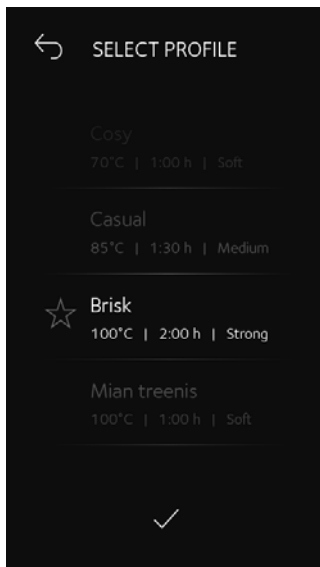

LÖYLY SETTINGS

You can choose a specific profile, or edit the löyly settings: temperature, sauna time and löyly quality separately, before switching the sauna ON, while the the sauna is heating and when sauna is ready. You can edit the settings directly in the main view by swiping up and down or by tapping on the setting, which opens the edit view.

Accept the changes by pressing the OK button at the bottom or discard the changes by pressing the BACK button in the upper left corner.

5

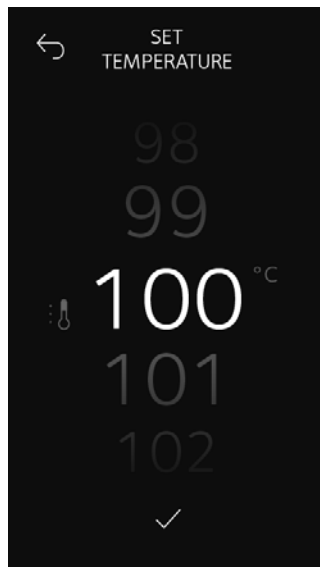

Profile selection

Select the sauna profile with the settings that suit you best.

7

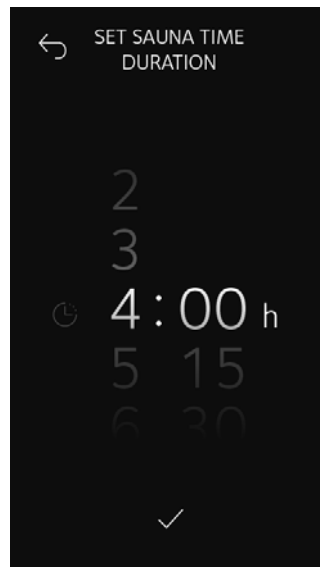

Temperature

Select a suitable temperature between: 40°C - 110°C

8

Sauna time

Set the time the heater is ON between: 15 minutes - 6 hours.

9

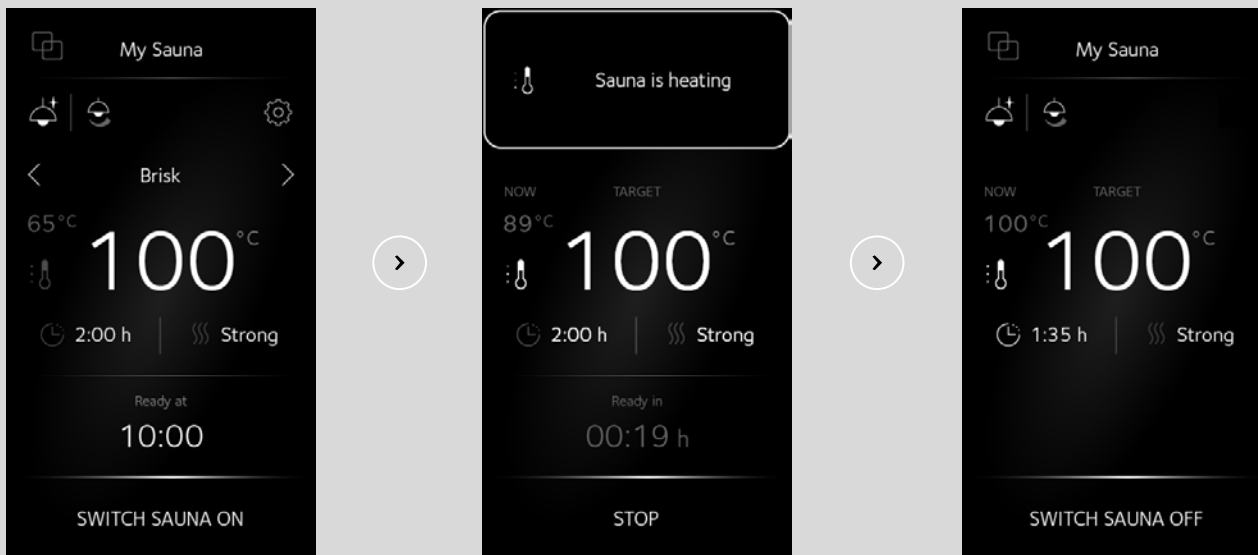

Löyly quality

Select the desired löyly quality. The temperature of the sauna heater stones affects the way the löyly feels.

HEATING THE SAUNA REMOTELY

With the Tulikivi Sauna application you can start the sauna remotely. The HOME view tells you exactly when the sauna will be ready at the earliest, based on the current time and the set temperature, as well as the sauna room temperature.

Before you switch the sauna ON, you can select the settings of the saved profile:

- ★ Brisk 100°C 3:00 h Strong
- ★ Casual 85°C 2:30 h Medium
- ★ Cozy 70°C 2:00 h Soft

or adjust settings in the edit views. The sauna heater will start to heat up when you tap the SWITCH SAUNA ON button at the bottom of the screen.

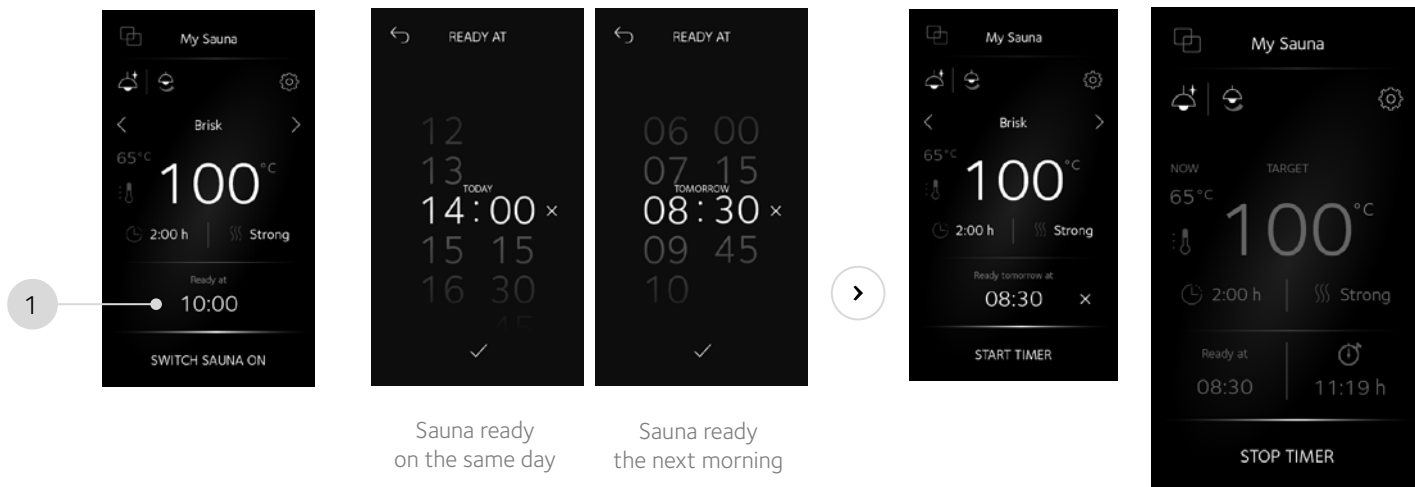

The application notifies you when the sauna starts to heat up and when the sauna is ready, i.e. when the set temperature has been reached.

The screen shows the sauna temperature, the remaining sauna time and the lüly quality. You can change these settings during the sauna.

The sauna switches off when the sauna time runs out or if you tap the SWITCH SAUNA OFF button. The heating process can be stopped by tapping the STOP button at the bottom of the screen.

HEATING THE SAUNA REMOTELY WITH TIMER

With the Tulikivi Sauna application you can set the sauna's TIMER remotely. You can select the time your sauna will be ready up to 24 hours ahead the next day.

Sauna ready
on the same day

Sauna ready
the next morning

Select the time by tapping the time the sauna will be ready (1), which opens the edit view. Accept the changes by pressing the OK button at the bottom or discard the changes by pressing the BACK button in the upper left corner.

Check the löyly settings of the profile and adjust if necessary. When the timer is on, the löyly settings cannot be changed.

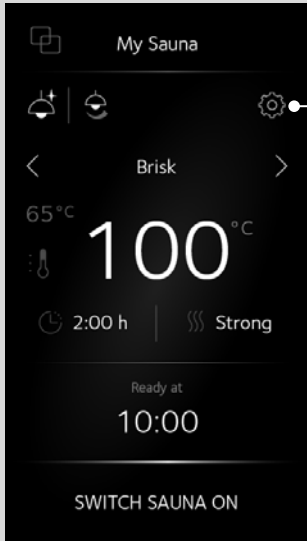

Tap the START TIMER button to start timer.

The timer will start immediately after the START TIMER button is pressed.

The screen shows the time the sauna will be ready and how much time until that point.

You can stop the timer by tapping the STOP TIMER button.

SAUNA SETTINGS

You can access the sauna settings by tapping the icon (1). To return to the home view, tap the arrow icon (2) in the top-left corner.

From the settings, you can manage profiles, users and user access rights.

3

PROFILE LIST
Create new, edit and delete profiles.

4

USER LIST
Add new, edit and delete users.

5

Application and Control Panel software versions info and update availability.

3

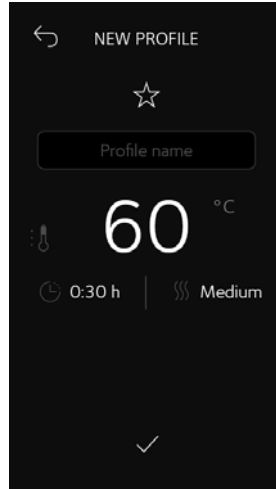

PROFILES

The profiles on the list are available to select in the main view

List

Edit view

Tap the PLUS icon at the top to create a new profile.

Tap a profile in the list to edit or delete it.

The default profiles can be modified, but they cannot be deleted.

Give the profile a name and adjust the settings accordingly.

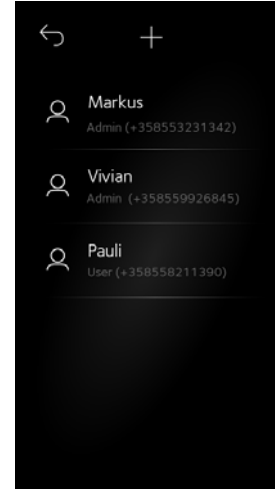

Accept the changes by pressing the OK button at the bottom or discard the changes by pressing the BACK button in the upper left corner.

4

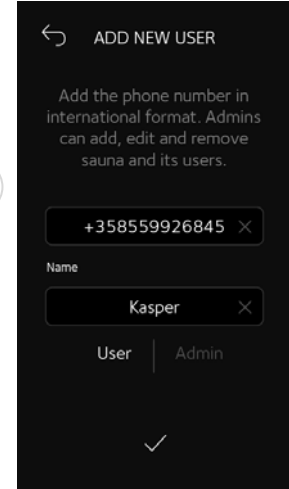

USERS

Users on the list have access to use the sauna remotely with application

List

Edit view

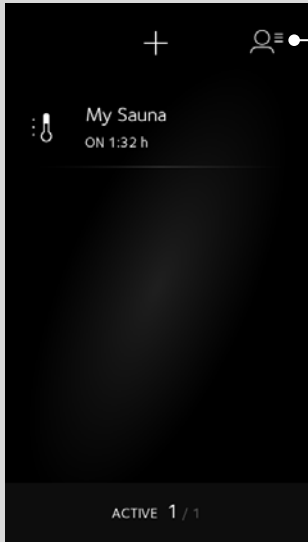

Tap the PLUS icon at the top to add a new user.

Tap a user in the list to edit or delete it.

Add phone number and name and set a role for the user.

Accept the changes by pressing the OK button at the bottom or discard the changes by pressing the BACK button in the upper left corner.

APPLICATION SETTINGS

You can access the application settings by tapping the icon (1). To return to the sauna list view, tap the arrow icon (2) in the top-left corner.

From the settings, you can change the application language and log out.

2

1

3

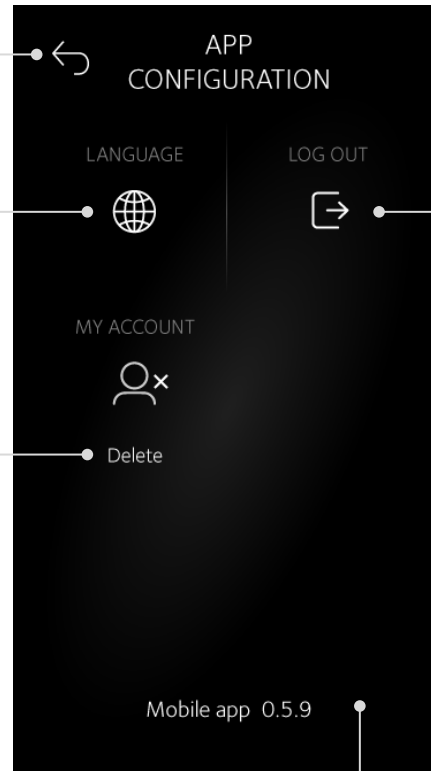

LANGUAGE

Change the application language.

5

DELETE ACCOUNT

All your data will be removed from the system.

4

LOG OUT

After logging out, you need to enter your phone number to receive a text message code to access the application again.
